# Our Most Urgent Project Needs

## A Tigers Emergency Patrols to Prevent Electric Shock

Goal : 300,000 Yen

A growing problem in India now is the use of electrified metal wires that are used to kill small animals that touch these wires. These are sometimes modified for poachers to use in the immediate vicinity of JTEF's activity site. We urgently need extra patrols to safely remove these wires and threats to the wildlife.

## B Elephants Conference Fees and Travel Costs for 2 Staff Attending the CITES Meeting in Sri Lanka

Goal : 300,000 Yen

In May, the CITES meeting will be held in Sri Lanka. JTEF leadership will go there to lobby other NGOs to ask for their support in pointing out the deficiencies in the Japanese domestic laws & help us take concrete actions to close the ivory market in Japan. With poaching still killing 20-30,000 African elephants a year, we must do our part in Japan!

## C Iriomote Cats Emergency Night Patrols and Drive Recorder

Goal : 300,000 Yen

Recently, due to increased sightings of Iriomote cats, we have started urgent patrols in the western part of Iriomote Island. However, due to a broken charging port we cannot use the drive recorder while patrolling. It is necessary to keep recording night patrol & safely conduct patrols while removing road killed wildlife from the roads.
